Her Excellency, Executive Mayor of Chief Albert Luthuli Local Municipality, Cllr  
Busi Shiba

Chief Malaza and Chief Dlamini

Ward councillor and other councillors present

Leadership and other dignitaries

Municipal manager

Ladies and gentlemen

Two months ago the country celebrated Mandela Month.

The Municipality was chosen to be the stage for the main provincial government activities for the celebration of the world icon of humanity and the first leader to usher democratic government in the country.

The most profound statement that the nation rallied around during that time was his solemn call to all people to make a difference in the lives of the less privileged, the down trodden and less fortunate.

We are a department known for distributing resources to ensure effective rollout of the provincial programme of action.

This responsibility includes ensuring the right level of connectivity for the province to conduct effective transaction with companies that make business with government.

We are also known for enabling the departments to have superior interlinked financial systems that are critical for all to pay service providers and salaries of employees.

Ours is a responsibility that includes making available information technology solution to enable everyday online communication with officials and importantly with all different stakeholders.

We are determined to share the little available resources to ensure continuous access to information technology systems within the communities.

It is for this reason that we immediately took the instruction of the Honourable MEC to deliver the facility, firstly as part of the contribution inspired by the call to make a difference everyday, and secondly to expanding access to World Wide Web, in a safe and comfortable space made available by the generosity of the Executive Mayor and her team.

Honourable MEC, Executive Mayor and ubkhosini this is the project that we committed to deliver when we were here just more than a month ago.

The purpose of the facility is to support the education of the African child who most often is required to research various topics as part of their education.

The location of this facility is also key.

It is very close to some of the schools, making our objective of realising significant improvement in content generated by learners in class room even more possible.

With those few word, I would like to thank the team from the municipality and department for facilitating this awesome internet experience for local community today.

I thank you
